## SKILLS

Data Science

AI/Machine Learning

Python

Front-end web development

Web scripting

Tableau / SQL

Data Modelling

Data Mining

## EDUCATION&

### CERTIFICATIONS

#### B.Eng Mechatronic Engineering

Bayero University kano,  
2016-2022

#### AI For Medicine

AI For Medicine Specialization  
In Coursera by Deeplearning.AI

#### Business Implication of AI

A course authorized by EIT Digital and  
offered through Coursera

#### Python For Genomic Data Science

a course authorized by Johns Hopkins  
University and offered through Coursera

#### Basic Data Processing And Visualization

course authorized by University of California San  
Diego and offered through Coursera

#### Python For Geospatial Analysis

an online course authorized by Coursera Project  
Network and offered through Coursera

## RESUME OBJECTIVE

Data Scientist with 3 years of experience in analyzing, visualizing, interpreting and modeling data in order to draw inference from data and drive successful business insight and solutions. Proficient knowledge in robotics, web design, and coding. Excellent understanding of programming, business operations and analytics tools for effective data analysis.

## EXPERIENCE

### DATA SCIENTIST

*Horizon Point Limited RC:1716339 -present*

- Manage the data and development of procedures for business reports
- Analyst and modify data for modeling and development of projects
- Collect and process data for analysis and forecast of the market report
- Develop new reports and delegate tasks to team members
- Perform market analysis to efficiently achieve objectives

### DATA ANALYST

*Magaga International Merchandised Nigeria Limited -present*

- Successfully interpreted data in order to draw inference and conclusions for managerial action and strategy
- Used advance visualization techniques and tools to elaborate data
- Used statistical techniques for hypothesis testing to validate data and interpretations
- Manipulate, process and feature engineering of data to solve real life problem

### DATA SCIENTIST

*KAD ICT HUB, KADUNA -present*

- Train and tutor young tech student on data science, AI and machine learning
- Conduct data regression, classification and supervised analyses.
- Used Tableau and Microsoft Excel to create data reports and visualization
